

STUDIO3 HOME REFRESH: ELEVATE YOUR HOME WITH PAINT & LIGHTING

NEUTRAL PAINT & LED LIGHTING:

Refreshing your home with light, neutral paint and upgraded LED lighting is one of the most impactful and affordable ways to prepare for market. These updates instantly make rooms feel larger, brighter, and more modern—both in person and in listing photos, where most buyers form their first impression. If painting the entire home isn't possible, focus on the main living spaces and the primary bedroom, and paint any darker accent walls the lightest color already used in the home to create a clean, cohesive look. Paired with bright, consistent LED lighting, these improvements help buyers see your home as move-in ready, updated, and well cared for.

BEFORE & AFTER:

The example shown received both updates and demonstrates how a simple refresh creates a brighter, more appealing space that draws in more buyers.
